AMAHLATHI LOCAL MUNICIPALITY

Together For Prosperity www.amahlathi.gov.za

MESSAGE FROM THE MAYOR

It is approximately 20 years since the amalgamation and birth of Amahlathi Local Municipality. During the two decades the municipality has seen about four administrations each with a five year term. I must also admit that there is a lot that has not been down which is key to the needs of our people. Some of our people still do not have electricity, shelter and most of all they are victims of the triple challenge. Poverty and unemployment is still the order of the day in many areas affecting mostly the youth. Inequality completes the triple challenge locally

This ending term is the 4th administration of Amahlathi Local Municipality and it began following the 2016 local government elections.

The first half of the term began with high enthusiasm and key to that was the identification of problems within the municipality. Major decisions were taken towards changing the financial problems foreseen by the council at the time however the process proved to lack effective consultation as a result it provoked labour unrest.

The unrest was followed by community protests that saw municipal buildings torched. That instability brought the municipality to its knees for about five months.

The municipality was soon after that subjected to section 139 for a period of nine months. There after it was almost the end of the term.

This term began with other problems that come with the demarcation process, through demarcation Amahlathi Local Municipality lost about 5 wards to Buffalo City Metro and Intsika Yethu Local Municipality. The municipality as a result of the reduction of wards received a lower equitable share. This was aggravated by the implementation of standardization by the third administration.

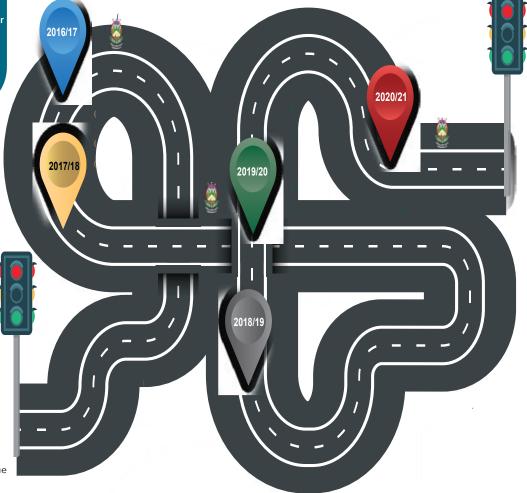

A lower revenue base against hiking employee cost created serious cash flow problems which meant the municipality had to delay salary payments in certain months.

Given all the challenges highlighted above Council did not postpone its duty to serve its people. This booklet is a summarised account of work done by the council over the two decades.

Under this administration, as if there were no obstacles, Council managed to improve road infrastructure, waste management facility, facilitate housing project and commence with a Sports Facility in Mlungisi and Keiskammahoek Fire Station amongst many other projects detailed in this volume.

The new Council is required to make its own assessment of the work done in order to establish what needs to be done next. Amongst those it would be the implementation of the electricity master plan, implementation of the development plans that we approved and procured and to fix the issue of cash flow problems.
